

Using Epson Scan:

1. Go to Start, Programs, Epson Scan, then Epson Scan
2. After Epson Scan is open, click the Mode down arrow on the top right corner
3. Select the Home mode from the Mode pull-down list on the top right hand corner
4. On the Home mode setting dialog box, check the desired settings such as color, destination, and image quality.
5. Click the Preview button to start the scan
6. When preview scan is finished, click the Scan button; A File Save Settings dialog box will pop up at this point
7. In this dialog box, you can specify where and how you want to save your image.
8. Click the Ok button when you are done
9. Scanning will start in a few seconds
10. When scanning is finished, the folder that stores your image will pop up. If you did not specify a special location to store your image, the default folder will be c:\Documents and Settings***your username***\My Documents\My Pictures
11. After a few seconds, Epson Scan program will show up again. You can continue to scan your next picture by repeating steps 4 – 10.
12. When you are finished with scanning, click the Close button to exit the program.
