

NEW class at BSU Cape Cod!

How to Drive a Computer

Learn how computers work & basic usage. Gain a conceptual knowledge of what's inside the box and get some basics on using Windows and the Internet. Learn simple maintenance, safety, and security for your computer and your data.

Registration Fee: \$99

Monday, April 2, 9, 23, 30

4 p.m.—8 p.m.

Instructor: Victor E. Smith, Project Manager/Systems Analyst
(certified by ICCP, Microsoft and CompTIA)
Datatech Computer Solutions

Working under his own trademark, DATATECH, Victor Smith works with businesses in Southeastern Massachusetts as a Systems Developer to implement computer based information systems. He enjoys designing, building and supporting networks and infrastructure as well as database implementations over local area networks using Microsoft Access. He has diverse experience in Information Systems including planning, systems analysis and design, networking, database, software development, project management, small business management, teaching and training. He maintains currency in technology skills and has a strong professional commitment toward completing projects that satisfy system stakeholders. His business is a Microsoft Registered Partner and an Intel Software Partner. He possesses the CSP/CCP certification from ICCP, the A+ and Net+ CompTIA certs, the MOUS Access cert, the MCSA cert and the MCP cert in SQL Admin from Microsoft. DATATECH is looking for clients who appreciate reliable IT support.

Specialties: [1] Local Area Networks – design, setup and support (certified by Microsoft and CompTIA) [2] Database – Design, Implementation and Support using Microsoft Access [3] Equipment – computers, printers, network and communication hardware – Certified by the Computer Technology Industry Association (CompTIA) [4] Microsoft Office – sales, support and training.
